Corp Crunch | SEO Strategy | 18-month roadmap

Tier 1 Global Media Aggregator — SEO Plan & Roadmap

Path for corpcrunch.io / corpcrunch.ai to compete with Tier 1 aggregators on discovery, topical authority, crawl efficiency, and branded demand — without copying commodity newswire SEO.

~300	18 mo	2 domains	6 pillars
URLs in sitemap today	Target horizon to Tier 1 lane	.io + .ai dual-host strategy	Workstreams in this plan

> **North star:** Become a default search destination for industry, fintech, AI, and corporate intelligence — measured by indexed coverage, organic sessions from target topics, brand SERP ownership, and referral loops from product surfaces (Intelligent / Finx / Solvterra).

What “Tier 1 aggregator” means here

Tier 1 is not “rank for every news keyword.” It is reliable discovery across category hubs, original analysis, and syndication-ready packages that other properties cite.

Tier	Examples (archetype)	SEO signature	Corp Crunch fit
Tier 1	Google News / Yahoo / major wires	Massive crawl budget, entity graphs, real-time index, brand queries	Aspirational ceiling — own niches first
Tier 1.5	Industry vertical aggregators	Topic clusters, newsletter + search loop, high returning visitors	Primary 12–18 month target
Tier 2	Regional / category publishers	Strong clusters, uneven international, thin product SEO	Current competitive band to exit

Current foundation (already shipped)

Technical & indexation

- Dual-domain sitemap + robots (.io / .ai)
- ~300 indexable URLs auto-discovered
- Article JSON-LD / OG / canonical helpers
- PR-draft SEO autofill in admin
- Category landing pages + ISR hubs

Gaps vs Tier 1.5

- Thin content volume vs aggregator crawl demand
- Limited entity / author E-E-A-T depth
- No News sitemap / Google Publisher Center ops
- Weak internal linking graph at scale
- Brand SERP incomplete (Knowledge Panel, sitelinks)

Strategy pillars (investment mix)

Relative emphasis for the next 18 months:

Pillar	Relative weight	Focus
Content velocity	26	Topic clusters, daily brief + weekly deep analysis, PR→publish
Technical SEO	22	Crawl health, CWV, News/image/video sitemaps, canonical/hreflang
E-E-A-T / brand	18	Author pages, company entities, editorial standards
Distribution	16	Newsletter loops, syndication, partner feeds
Data products	12	Intelligent / Finx / Solvterra as money pages
Intl / multi-domain	6	EN priority markets; selective AR/ES later

18-month roadmap

Phase 0 — Stabilize & measure (0–30 days)

Outcome: Accurate baseline in Search Console for both domains; no indexation debt blocking growth.

Workstream	Action	Owner cue	Done when
GSC	Verify .io + .ai; submit sitemaps; export Coverage	Growth / SEO	Both properties show Success + URL counts
CWV	Fix LCP on homepage/hero; lazy non-critical CSS	Eng	p75 LCP < 2.5s on mobile for home + article
Index hygiene	Audit noindex/draft leaks; thin category pages	Eng + Editorial	Zero accidental noindex on public articles
Analytics	GA4 + Search Console + consent funnel aligned	Growth	Organic landing page report weekly

Phase 1 — Indexation & topical spine (Months 1–3)

Initiative	Detail	KPI
News sitemap	Separate Google News sitemap for articles < 48h; Publisher Center setup	News impressions > 0 within 60 days
Hub architecture	Every category hub = editorial intro + top stories + entity links + FAQ schema	+40% hub organic clicks QoQ
Internal linking	Auto-related articles + company tags + “more in category” blocks	Avg crawl depth to article ≤ 3
PR → publish SLA	Use SEO autofill; editorial polish within 48h of paid/approved PR	≥ 70% drafts published with complete meta
Cadence	Min 5 original / curated analyses per week across priority verticals	Indexed articles +25% in 90 days

Phase 2 — Authority & entity graph (Months 4–9)

Initiative	Detail	KPI
Author system	Dedicated author pages, Organization + Person schema, LinkedIn sameAs	Author SERP impressions rising
Company graph	Scale /company pages; link from articles; sitemap already includes them	Company pages in top 20 for brand+news queries
Cluster content	Pillar pages: AI regulation, AML/KYC, ESG reporting, fintech rails	≥ 8 clusters with 8+ supporting URLs each
Digital PR	Original data briefs, event research (AIX / C3), quotable charts	Referring domains +30% in 6 months
International	hreflang / region strategy for EN priority markets; selective AR/ES later	Non-US organic ≥ 25% of sessions

Phase 3 — Aggregator product SEO (Months 10–15)

Initiative	Detail	KPI
Live desks	Topic desks (AI, Finance, Sustainability) with always-on hubs	Desk hubs in top 10 for 3 head terms each
Structured feeds	RSS / Atom / JSON feeds per category for partners & AI crawlers	Partner referral + feed subscribers tracked
Product bridge	Contextual CTAs from articles → Intelligent / Finx / Solvterra	Organic → product CTR baseline + lift
Events SEO	Year-round event entity pages, speaker schema, recap clusters	Events organic + branded lift during campaigns
Media kit SEO	About, team, methodology, advertising — trust URLs that convert PR	Brand query share of voice ↑

Phase 4 — Tier 1 lane behaviors (Months 16–18)

Initiative	Detail	KPI
Real-time index	Sub-hour publish → crawl for breaking desks; ping Indexing API selectively	Median index latency < 4h for news
Knowledge presence	Wikidata / consistent NAP / logo / social graph for Knowledge Panel	Brand Knowledge Panel / sitelinks present
Multi-format	VideoObject + e-magazine SEO; transcript pages for media	Non-HTML formats in top queries
AI Overviews readiness	Clear entities, citations, unique data tables Google can quote	Cited / featured in AI Overviews for priority topics

Priority topic map (aggregator spine)

Cluster	Hub URL pattern	Supporting content	Commercial bridge
AI & enterprise	/technology, /ai-innovation	Regulation, adoption, vendor moves	Intelligent / AIX
Fintech & risk	/finance, /fintech-growth	AML, KYC, fraud, payments	Finx suite
ESG / climate	/sustainability	Reporting standards, supply chain	Solvterra
Corporate strategy	/market-analysis, /strategic-planning	M&A, leadership, earnings angles	PR / article requests
Telecom & retail	/telecom, /retail, /digital-retail	Infrastructure + consumer shifts	Events / sponsors

Operating cadence

Daily

- Publish / update priority desk
- GSC anomaly scan
- Internal link pass on new posts

Weekly / Monthly

- Cluster gap review; CWV + 404 sample
- Top query → content brief
- Index coverage deep dive; backlink/PR report
- Hub rewrite for losers

Scorecard — Tier 1.5 checkpoints

Metric	Now (approx)	6 months	18 months
Indexed public URLs	~300	800–1,200	3,000+
Organic sessions / mo	Baseline TBD	3× baseline	10× baseline
Category hubs in top 10 (EN)	Few / none	6 hubs	15 hubs
Referring domains	Baseline TBD	+30%	+100%
Brand query share	Emerging	Own brand SERP	Brand + category sitelinks
News / Discover eligibility	Partial	Active	Consistent Discover traffic

Baselines should be locked in Phase 0 from Search Console + GA4.

> **Do not chase:** Ranking for generic “breaking news” against Tier 1 wires burns crawl budget. Win as the **industry intelligence aggregator** with product-backed authority (Intelligent, Finx, Solvterra, events), then expand adjacency.
